PROFESSIONAL SUMMARY

BS Information Technology graduate with hands-on experience in **software development, QA testing, technical support, and application troubleshooting** through internships and project-based work. Skilled in developing and testing web and mobile applications, troubleshooting technical issues, and working with databases and modern development tools. Strong problem-solving, documentation, and collaboration skills with a willingness to learn and adapt to new technologies.

TECHNICAL SKILLS

Languages : JavaScript, PHP, Python (Basic), C# (Basic)

Frontend : React, Next.js, Vue.js, HTML5, CSS, Tailwind CSS, Bootstrap, shadcn/ui

Database: PostgreSQL, MySQL, Supabase

Software Engineering: Agile (Scrum), Sprint Development, REST API Development, Authentication & Authorization (RBAC), Responsive Web Design, CRUD Application Development, Relational Database Design, Git Version Control, Software Testing, Bug Tracking

Software Testing: Manual Testing, QA Testing, Test Case Design & Execution, Functional Testing, User Acceptance Testing (UAT), Bug Reporting, Bug Tracking, Regression Testing, UI Testing

Technical Support: Hardware Troubleshooting, Software Installation & Configuration, Operating System Installation, Desktop Support, Printer Configuration & Troubleshooting, Computer Maintenance, Technical Troubleshooting, End-User Support

Documentation: System Flowcharting, Technical Documentation, User Manual Documentation

Tools: Git, GitHub, VS Code, Cursor, Claude, OpenAI Codex, XAMPP

TECHNICAL PROJECTS

BloodNetwork.net | NPO Startup

Internship Project | Jan 2026 - Jul 2026

Web & Mobile Application Development Project

Tech Stack: Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Expo React Native

- Developed web and mobile features using Next.js, React, TypeScript, Expo React Native, Supabase, and PostgreSQL.
- Built responsive interfaces and reusable UI components for desktop, tablet, and mobile users.
- Implemented authentication, RBAC, form validation, and database-driven workflows.
- Developed donor-facing mobile functionality for event booking, contribution tracking, and donation history.
- Integrated frontend applications with Supabase/PostgreSQL for data management.

Smart POS System

Capstone Project | Jan 2025 - Nov 2025

Tech Stack: PHP, MySQL, JavaScript, Tailwind CSS, Chart.js

- Designed and developed a client-server POS system with multi-role modules (POS, kiosk, barista, manager) for ordering and transaction management.
- Built real-time sales analytics dashboard using Chart.js for tracking sales trends and performance insights.
- Designed database schema, system architecture, and workflow for end-to-end transaction processing.
- Conducted system testing (alpha, beta, gamma) and prepared technical documentation for deployment and user training.

Car Rental Management System

Freelance Development Project | Jan 2025 - Jun 2025

Tech Stack: PHP, MySQL, JavaScript, Tailwind CSS, Flowbite, Nodemailer, Chart.js

- Developed a centralized booking and rental management system with customer and admin modules for vehicle reservations and transaction handling.
- Designed database schema and system flow for structured booking, inventory, and rental data management.
- Implemented admin dashboard with inventory tracking, booking management, analytics, and reporting features, and integrated email notifications using Nodemailer.

WORK EXPERIENCE

QA Tester / Software Developer Intern | NPO Startup

Little Ark Foundation Inc. | Jan 2026 - Jul 2026

Tech Stack: Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Expo React Native

- Created and executed **700+ QA test cases** covering RBAC, UI consistency, validation, and end-to-end workflows.
- Performed functional, regression, smoke, responsive, and UAT testing to identify defects before deployment.
- Documented and reported bugs, reproduced issues, and collaborated with developers to verify fixes.
- Improved mobile and tablet usability through UI/UX enhancements, responsive design, and validation feedback.
- Assisted in troubleshooting workflow, navigation, and validation issues across web and mobile applications.
- Collaborated with developers and stakeholders throughout feature development, testing, and issue resolution.

Global Reciprocal Colleges

IT Support Assistant (Student Assistant) | Jul 2022 - Jul 2026

- Assisted in setting up and maintaining computer laboratories, including workstation preparation and system configuration.
- Performed hardware repairs, upgrades, and peripheral troubleshooting to support lab operations.
- Installed and configured operating systems, software, printers, and lab equipment for classroom and office use.
- Provided technical support for faculty and staff, resolving issues related to connectivity, printers, system access, and hardware.

Golden Arches Development Corporation - McDonald's

Service Crew | Aug 2022 - Jul 2026

- Processed customer orders and supported daily store operations in a fast-paced service environment.
- Performed basic troubleshooting of store equipment (POS terminals, peripherals, displays) and escalated technical issues when needed.
- Conducted initial hardware checks and preventive maintenance to ensure system and workstation functionality.

Be Connected Management Services - Bench

Stock Clerk | Jun 2021 - Jul 2022

- Managed stockroom organization, inventory checking, and item monitoring to support accurate stock handling and daily store operations.
- Performed basic store maintenance and hardware support, including cable cleanup, system unit maintenance, POS-related checks, and defective fixture reporting.

Rustan Supercenters, Inc. - Shopwise

Bagger | Jun 2020 - Nov 2020

- Packed customer purchases efficiently and assisted with checkout and carry-out support to maintain smooth front-end store operations.

Jollibee Food Corporation - Jollibee

Service Crew | Sep 2018 - Sep 2019

- Supported customer service, order taking, food preparation, and store cleanliness to maintain efficient operations in a fast-paced team environment.

EDUCATION

Global Reciprocal Colleges

Caloocan City | Jul 2022 - Jul 2026

- Bachelor of Science in Information Technology (BSIT)
- Relevant Coursework: Web Development, Object-Oriented Programming, Database Management Systems, Software Engineering, System Analysis and Design, API Development, and Mobile Application Development.
