SMART POS USER MANUAL

S.Y. 2024-2025

KIOSK

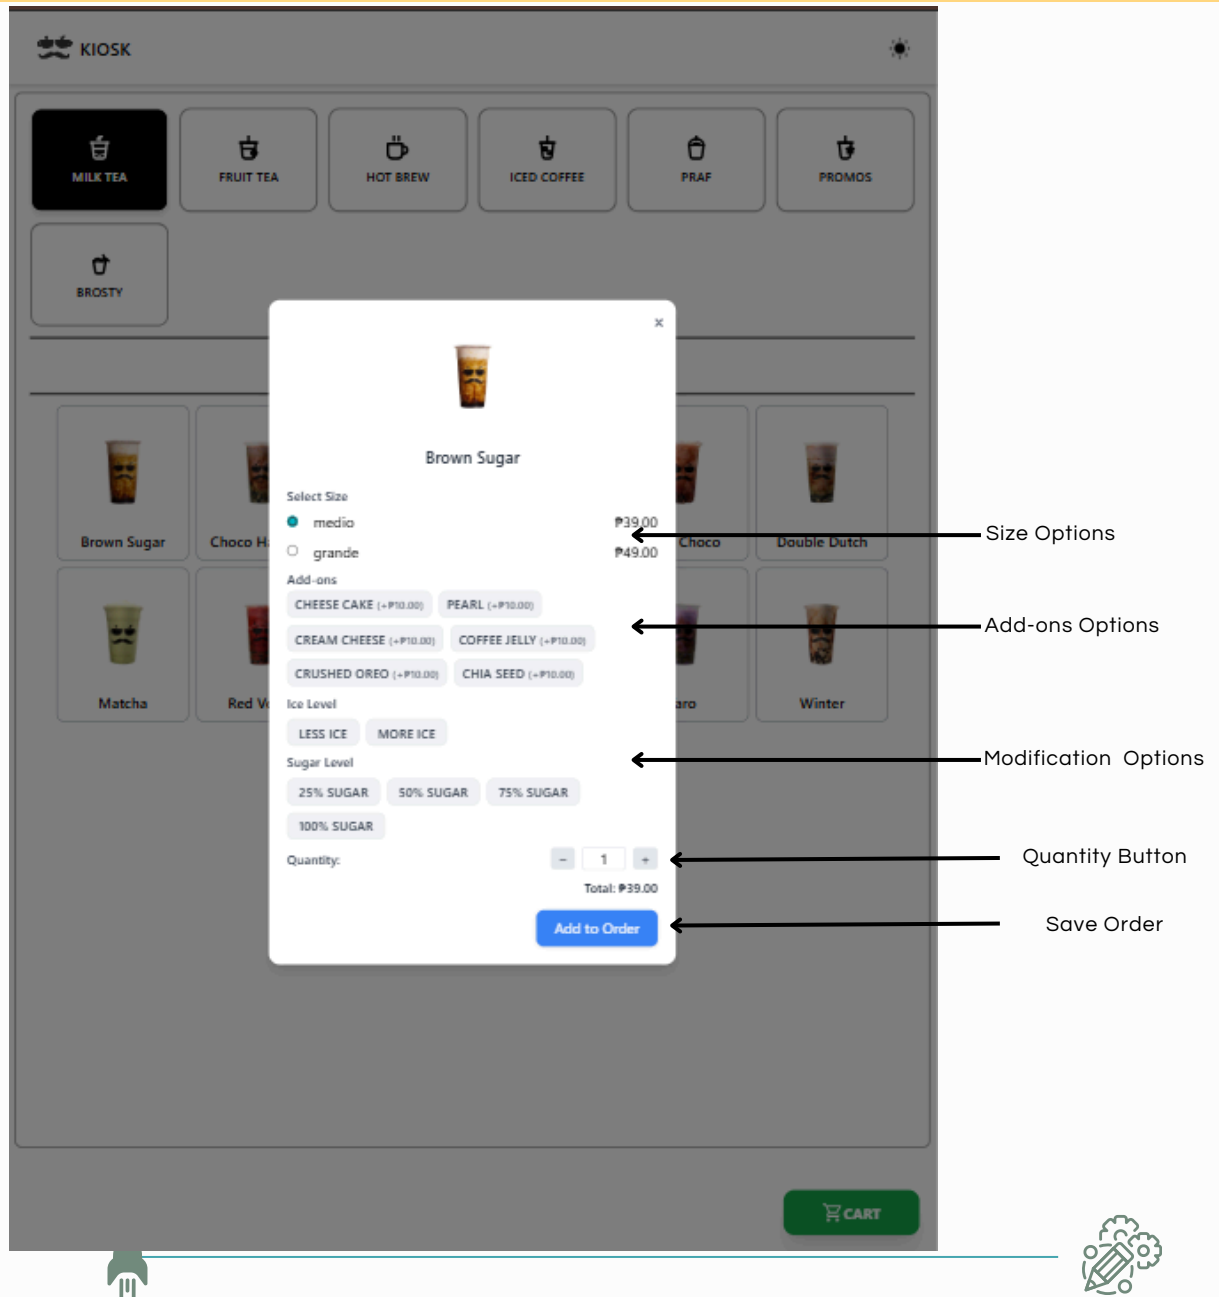

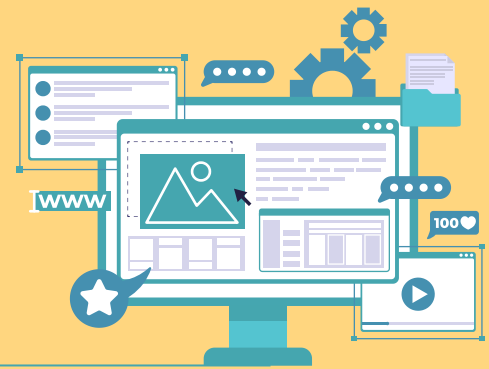

You can switch to another category to explore more items.

You can Open the Cart by Clicking this Button

KIOSK

The Kiosk module in the Smart POS system allows customers to input orders directly through a touch-screen interface. Users can select product categories, choose products, and customize orders such as sizes or add-ons. Once the order is finalized, the kiosk sends the order directly to the Smart POS database system for processing by the cashier. This eliminates manual order taking, reduces errors, and ensures that all orders are accurately recorded in real-time, improving overall efficiency in the POS operation.

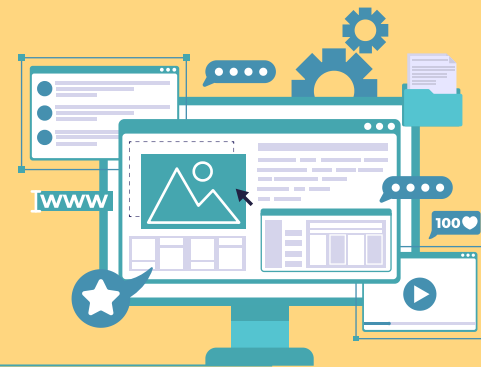

KIOSK

KIOSK POP-UP ORDERING MODAL

A pop-up ordering modal appears when you click a product. From there, you can modify your order by adjusting the size, sugar level, ice, and add-ons before confirming.

Click this to Edit order

This is the Cart Button

KIOSK POP-UP CART

The Kiosk Pop-up Cart appears after clicking the cart button. It displays all selected items along with their details, such as size, sugar level, ice preference, and add-ons. Users can review, modify, or delete items before sending the order to the POS for processing. This feature ensures order accuracy and provides a clear summary before final confirmation.

SMART POS

POS

Use QR Code Scanner for Quick Login

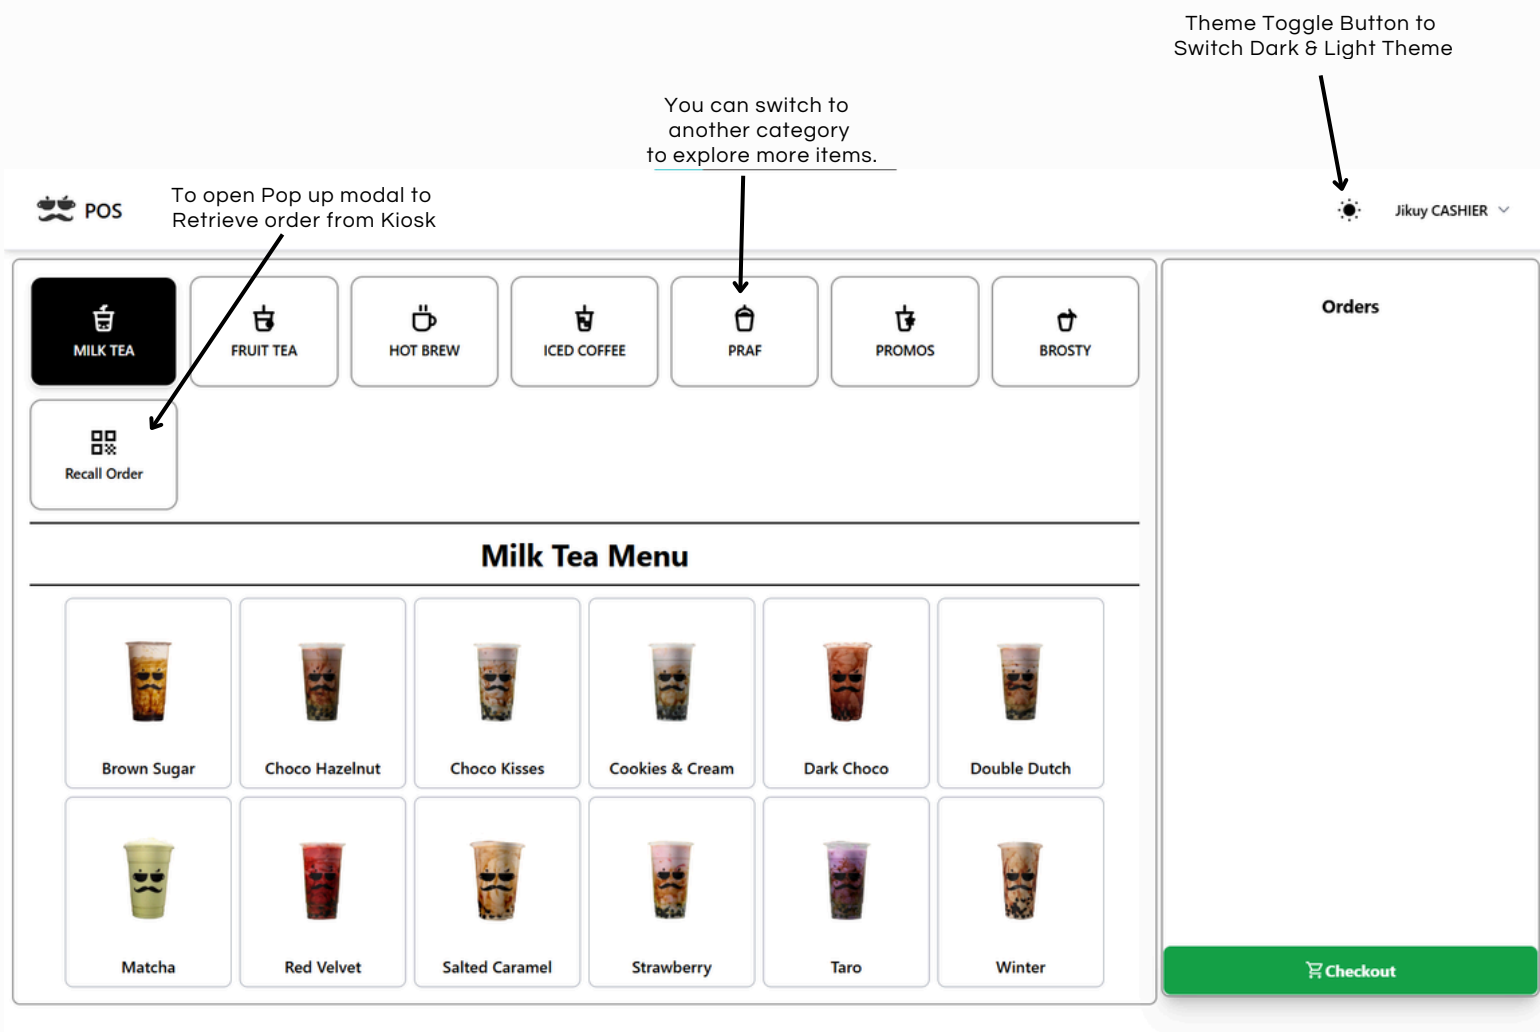

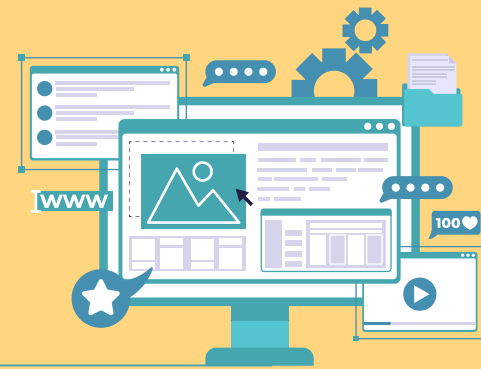

CAHIER AUTHENTICATION

QR-Based Login allows cashiers or staff to log in using a QR code located on their ID. Scanning the QR code automatically authenticates the user, providing a fast, secure, and convenient way to access the POS

SMART POS

POS

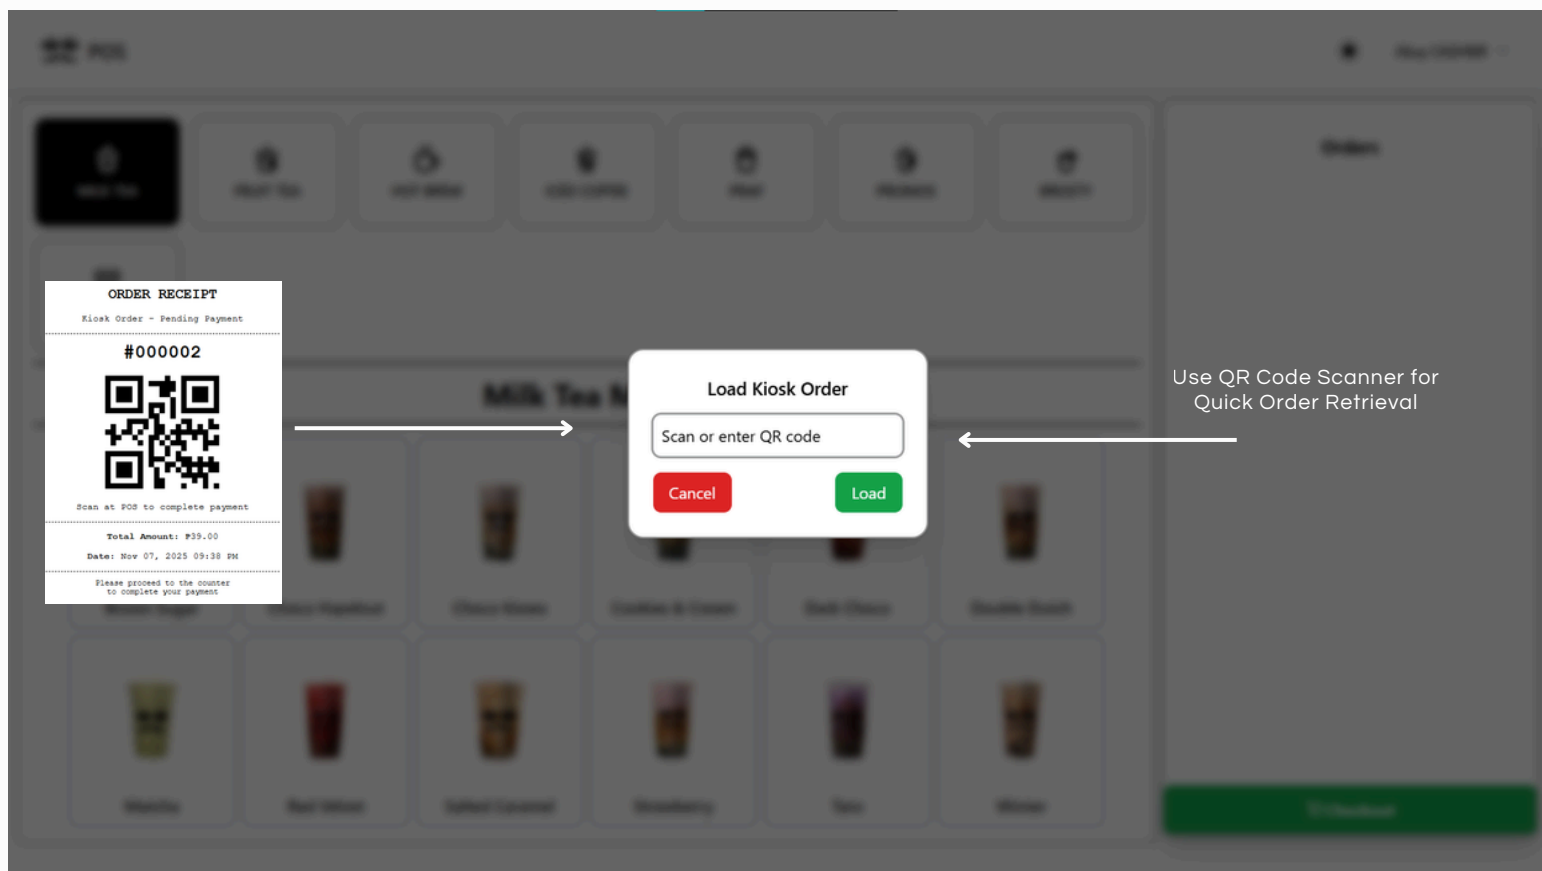

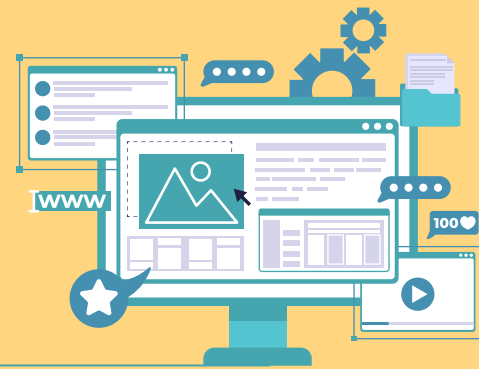

CASHIER INTERFACE

The Cashier Interface is the main screen used by authorized staff to manage transactions. It displays active orders, allows adding and modifications to item

SMART POS

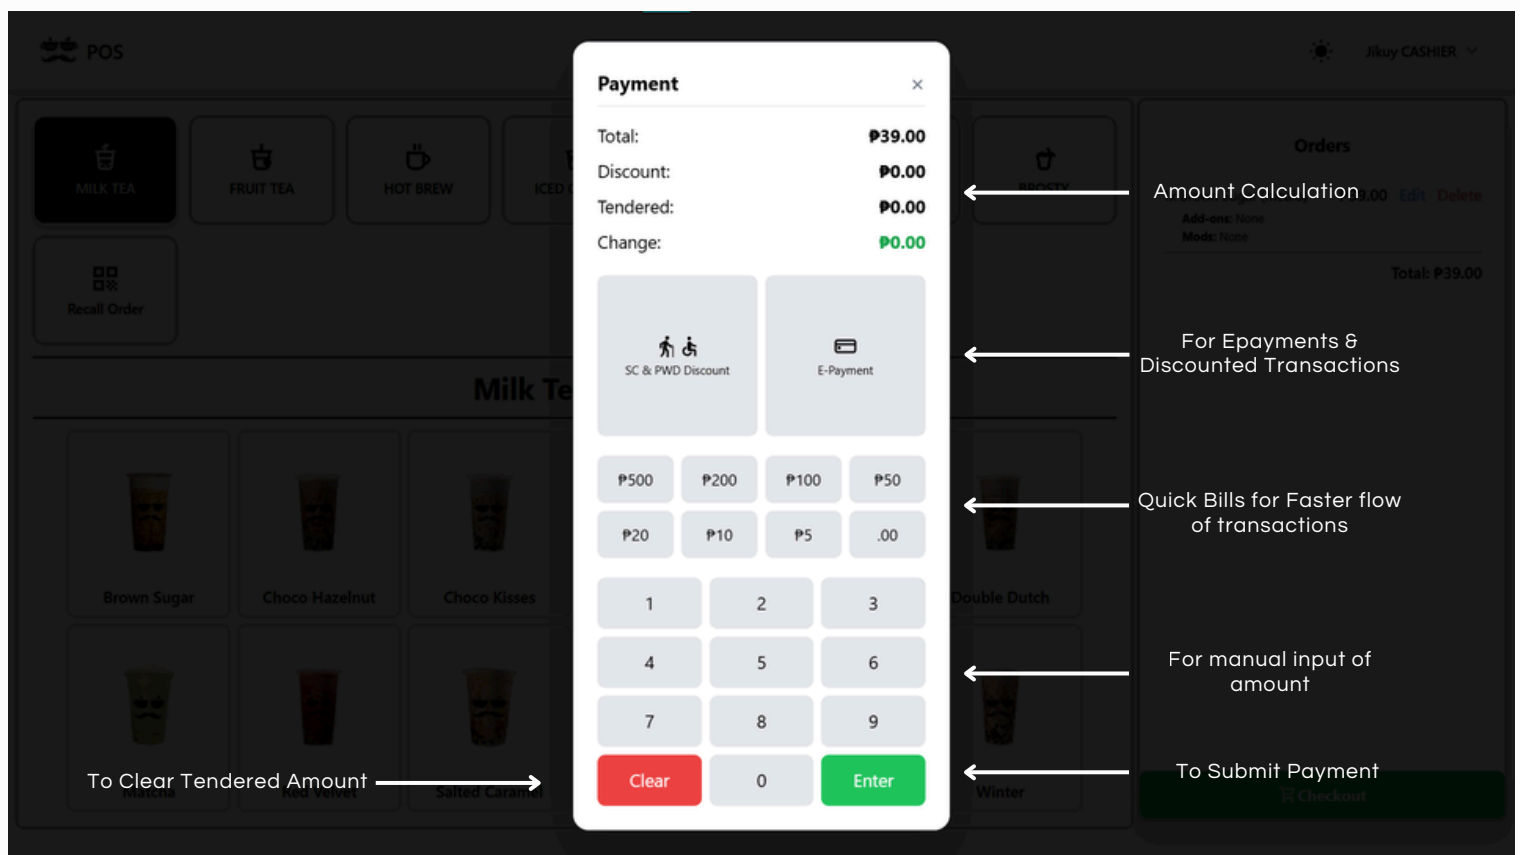

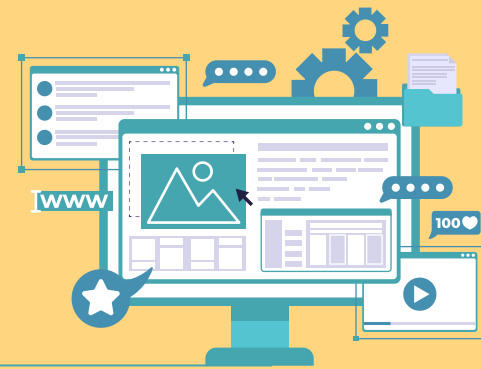

POS

CASHIER INTERFACE : SCAN QR

Scan the QR code from the kiosk to retrieve the customer's order. This allows the cashier to view, modify, or process the order efficiently in the POS system.

POS

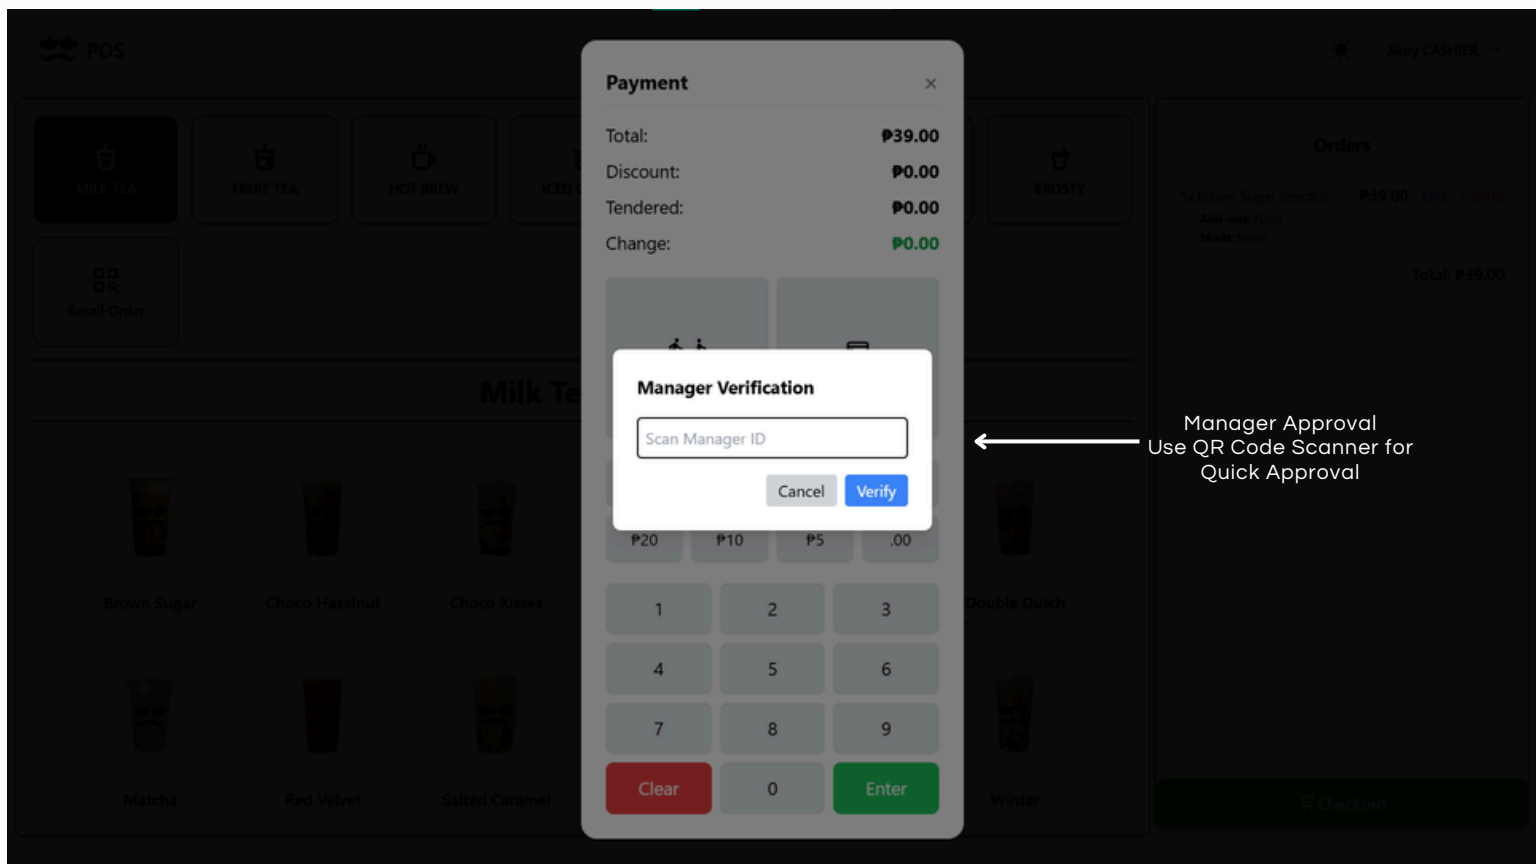

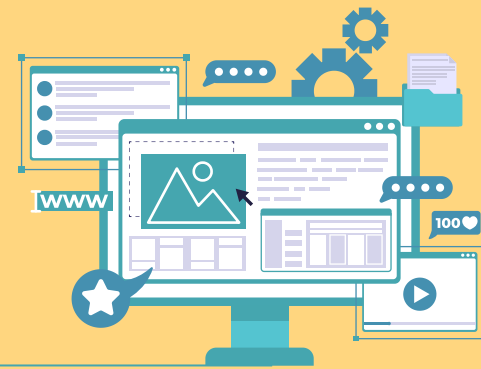

CASHIER INTERFACE : CALCULATOR MODAL

The calculator modal allows cashiers to perform quick calculations, such as totals, adjustments, and applying discounts, directly within the POS system for faster and more accurate order processing.

SMART POS

POS

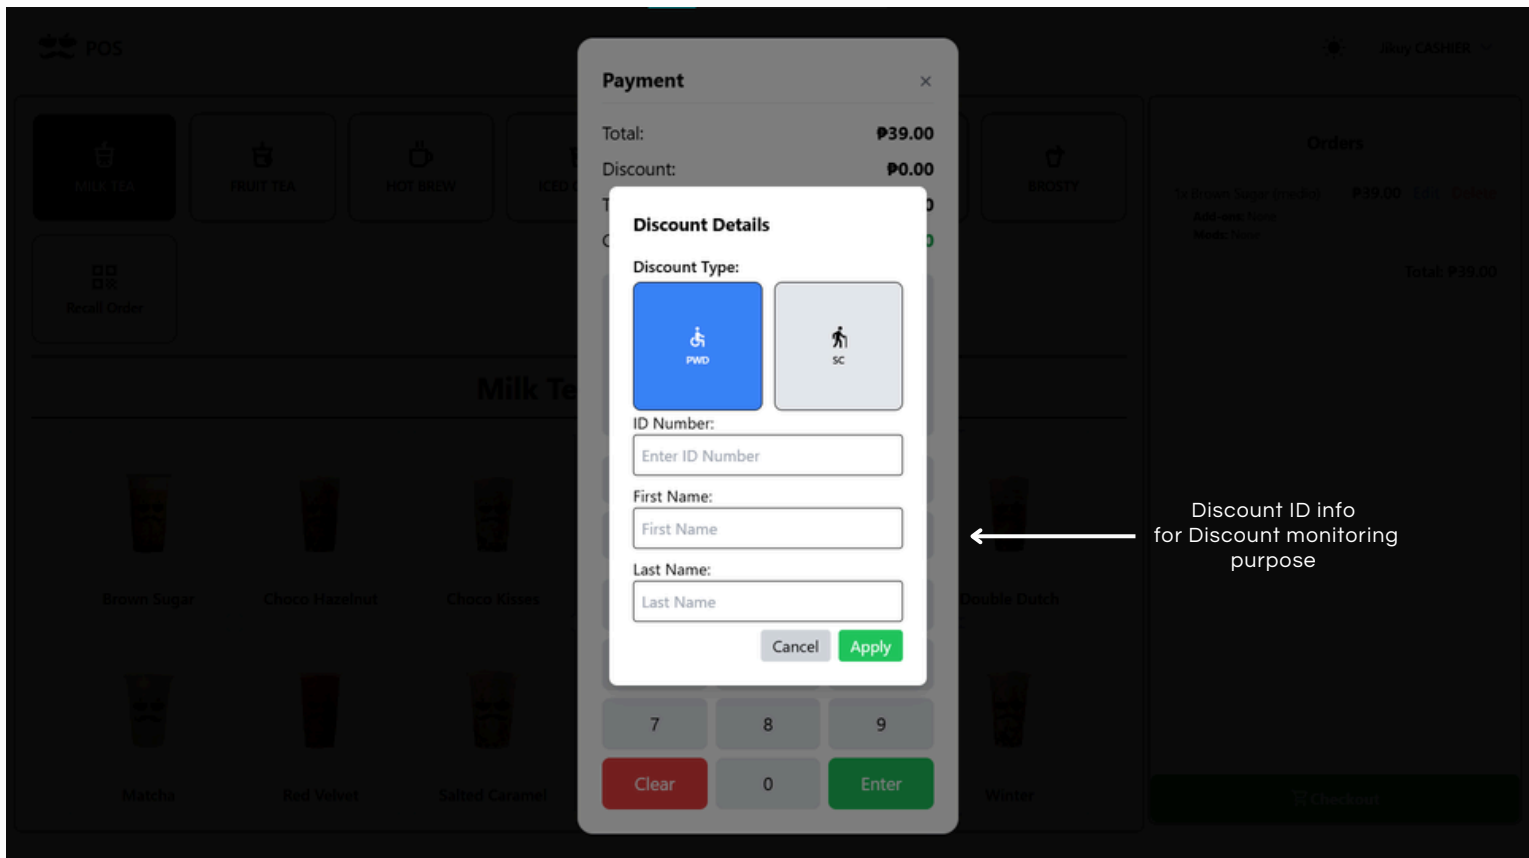

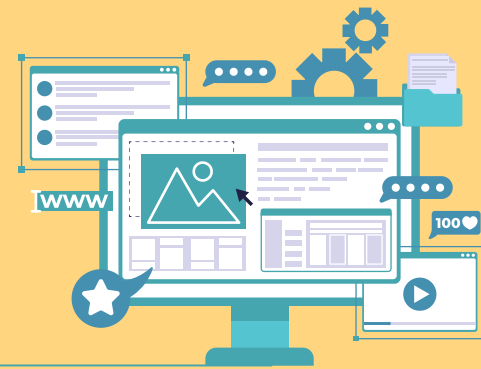

CASHIER INTERFACE : CALCULATOR MODAL

Before a discount is applied, a manager must scan their ID for approval, ensuring proper authorization and maintaining transaction security.

SMART POS

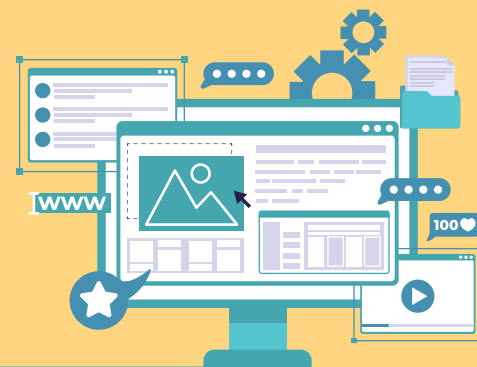

POS

CASHIER INTERFACE : CALCULATOR MODAL

For government compliance, the system requires the input of the manager's ID, name, contact number, and discount type, ensuring proper monitoring and accountability in case of audits.
