

Cornelio A. Gatbonton Jr

Junior Web Developer | Web Applications | Technical Support

Manila, Philippines | [linkedin.com/in/corneliogatbonton](https://www.linkedin.com/in/corneliogatbonton) | corneliogatbontonjr21@gmail.com | <https://cornelio-portfolio.vercel.app/>

PROFESSIONAL SUMMARY

Junior Web Developer focused on building responsive web applications using React/Next.js, with experience in authentication, role-based access, and database-driven systems through internship and project-based development. Built and contributed to POS, rental management, and mobile applications with emphasis on usability, workflow efficiency, and system reliability.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, JavaScript, Tailwind CSS, Bootstrap, shadcn/ui
- **Backend:** Node.js, PHP, Supabase
- **Database:** PostgreSQL, MySQL
- **Testing:** QA Testing, UAT, Bug Reporting
- **Tools:** Git, GitHub, VS Code, XAMPP

INTERNSHIP EXPERIENCE

Junior Web Developer (Intern)

Little Ark Foundation Inc. | Jan 2026 - June

Tech Stack: Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Expo React Native

- Improved system responsiveness using Tailwind CSS, extending accessibility from desktop-only to mobile and tablet users
- Created and executed 700+ QA test cases covering RBAC, UI consistency, validation, and end-to-end workflows
- Documented, reported, and helped resolve system bugs, improving workflow reliability, validation behavior, and overall usability.
- Implemented UX improvements including mobile optimizations, validation feedback, and QR-based scanning for faster workflows
- Developed a donor-facing mobile application for event booking and contribution tracking, improving donor access to blood donation schedules, participation records, and personal donation history.

TECHNICAL PROJECTS

Smart POS System

Capstone Project | Jan 2025 - Nov 2025

Tech Stack: PHP, MySQL, JavaScript, Tailwind CSS, Chart.js

- Designed and developed a client-server POS system with multi-role modules (POS, kiosk, barista, manager) for ordering and transaction management.
- Built real-time sales analytics dashboard using Chart.js for tracking sales trends and performance insights.
- Designed database schema, system architecture, and workflow for end-to-end transaction processing.
- Conducted system testing (alpha, beta, gamma) and prepared technical documentation for deployment and user training.

Car Rental Management System

Freelance Development Project | Jan 2025 - Jun 2025

Tech Stack: PHP, MySQL, JavaScript, Tailwind CSS, Flowbite, Nodemailer, Chart.js

- Developed a centralized booking and rental management system with customer and admin modules for vehicle reservations and transaction handling.
- Designed database schema and system flow for structured booking, inventory, and rental data management.
- Implemented admin dashboard with inventory tracking, booking management, analytics, and reporting features, and integrated email notifications using Nodemailer.

WORK EXPERIENCE

Golden Arches Development Corporation - McDonald's

Service Crew | Aug 2022 - Jun 2026

- Processed customer orders and supported daily store operations in a fast-paced service environment.
- Performed basic troubleshooting of store equipment (POS terminals, peripherals, displays) and escalated technical issues when needed.
- Conducted initial hardware checks and preventive maintenance to ensure system and workstation functionality.

Global Reciprocal Colleges**IT Support Assistant (Student Assistant) | Jul 2022 - Jul 2026**

- Assisted in setting up and maintaining computer laboratories, including workstation preparation and system configuration.
- Performed hardware repairs, upgrades, and peripheral troubleshooting to support lab operations.
- Installed and configured operating systems, software, printers, and lab equipment for classroom and office use.
- Provided technical support for faculty and staff, resolving issues related to connectivity, printers, system access, and hardware.

Be Connected Management Services - Bench**Stock Clerk | Jun 2021 - Jul 2022**

- Managed stockroom organization, inventory checking, and item monitoring to support accurate stock handling and daily store operations.
- Performed basic store maintenance and hardware support, including cable cleanup, system unit maintenance, POS-related checks, and defective fixture reporting.

Rustan Supercenters, Inc. - Shopwise**Bagger | Jun 2020 - Nov 2020**

- Packed customer purchases efficiently and assisted with checkout and carry-out support to maintain smooth front-end store operations.
